

Window Mobile

Create a mobile from items found in nature. Hang it in your window to share it with your neighbourhood.

Materials:

1. A cool-looking branch or stick
2. String, yarn, or cord
3. Interesting natural materials like rocks, dried flowers, and feathers. What can you gather from your yard? Get creative! (Or, try shells, driftwood and sea glass from your last trip to the beach for a nautical themed mobile.)
4. Strong glue that dries clear

How to make the mobile:

1. Tie a piece of cord to both ends of your stick creating a loop for hanging
2. Lay your objects on the floor to find a pattern you like
3. Tie the cord around the objects and secure with glue at the back
4. Tie the cords to the stick
