

# Nature Weaving for your Window or Door

---

Spring is the season of renewal and growth. It is also the time for spring-cleaning around the house and yard. You can combine these two tasks to create some beautiful art for your window or front door.

To make the nature weaving project you see below, you will need an old picture frame, any size, colourful wool, string or old fabric torn into strips, and a collection of dried flower stalks, spring flowers, twigs, and feathers. Use any natural objects that catch your eye.

To start, wrap your yarn or string around your frame, being sure to secure it at the top and bottom. Once you have completed that task, you can begin to weave in your natural objects. We chose both long and short items here so that we could weave some materials in from top to bottom, while the shorter items were woven in starting part way down.
